

EarPlanes

Product Information

Let your ears fly First Class®

Around 1.7 billion people travel by air every year. According to research around 30% of these airline passengers always suffer from ear pain or discomfort when they travel. Of the remaining 70% around 50% will occasionally experience ear discomfort.

Clinically tested by US Navy aviators at the Miramar Naval Air Station in San Diego, EarPlanes have been developed by Cirrus Healthcare Products LLC in conjunction with the House Ear Institute in Los Angeles.

EarPlanes alleviate the symptoms experienced by sufferers of ear discomfort or Barotrauma as it is more commonly known.

EarPlanes are recommended by American Airlines for use by their Flight Attendants.

How EarPlanes work

EarPlanes consist of a silicone ear plug which acts as an airtight seal between the product and the ear canal and a ceramic pressure regulator which acts as a controlled posterity filter when inserted into the ear.

As cabin pressure changes the filter acts as impedance to the flow of air into and out of the ear canal.

A blocked Eustachian tube is the most common form of discomfort usually caused by changes in cabin air pressure when an aeroplane descends EarPlanes provide an equal but opposite impedance on the exterior of the middle ear, allowing relief.

Product Features

EarPlanes are suitable for people with:

- sensitive ears
- who are suffering from allergies
- are suffering with a sinus problem

EarPlanes are suitable for people of all ages A paediatric version is available for children 1 to 10 years of age.

Earplanes help to filter out high frequency noise generated by aircraft engines whilst at the same time allowing the passenger to hear airline flight announcements.

- EarPlanes are disposable
- EarPlanes are available over the counter and without prescription
- EarPlanes are manufactured from medical grade silicone and contain the unique CeramX™ Filter

Cirrus Healthcare are proud sponsors of Joanne Jackson, Olympic & World Championship medallist.

Joanne uses our BioEars and ClearEars products.
